

Assignment 4
MINI PROJECT: CAMPUS HELP DESK
Time:50 min

Objective:

Create a small web application where students can submit and manage campus-related problems or requests frontend Requirements

Create a form containing:

Student Name

Email

Category

Problem Description

Priority

Display all submitted requests below the form.

Backend Requirements

Create an Express server and implement:

GET /api/requests

GET /api/requests/:id

POST /api/requests

PUT /api/requests/:id

DELETE /api/requests/:id

Store all data in requests.json using the Node.js fs module.

Frontend Requirements

Use the JavaScript fetch() API to:

Get all requests.

Submit a new request.

Update a request.

Delete a request.
